The51%.ai

Solution

What does The51%.ai means?

The51%.ai is a super-intelligent chatbot designed to empower African women via access, engagement with, and utilisation of human rights instruments through a web-based agentic chatbot and low-tech channel for offline accessibility and low digital literacy via Unstructured Supplementary Service Data (USSD) and SMS.

This low-tech solution eliminates the need for internet connectivity, making it accessible to a wider range of users.

AWiM's Kigali Declaration

22/7/2025 15:09:31

The Kigali Declaration was launched in 2023 at the African Women in Media (AWiM) Conference in Kigali as a unifying commitment by African media organizations, journalist, and partners. Its mission is to confront and prevent gender-based violence in and through media. Though collective action, the Declaration works to build safe, ethical, and inclusive media spaces that value respect and integrity. As a KD signatory, you'll join a community dedicated to change, equipped with resource, training, and a clear framework for advancing ethical practices across the continent
